

On-Line

Math Refresher

Pearson and the IEC have prepared a customized assessment and remediation math websites specifically for you. The website features two different features:

- **MyMathTest** - which will allow you to evaluate your math skills with some simple math examples - (cost \$10)
- **MyCourse** - is an online math course to allow learners to remediate. The online assessment contained in MyMathTest was developed in coordination with an IEC subject matter expert. (cost \$102)

You can access this customized website at: http://www.pearsoncustom.com/us/iec_mml_mmt

is a testing and placement tool designed in collaboration with

IEC National and IEC Chapter Representatives to assess students' strengths and knowledge gaps. MyMathTest offers a unique online assessment system that has been tailored to meet the needs of an IEC apprentice. Students build their skills by taking practice tests and working in their personalized study plan, which shows what skills they need to improve and provides tutorial learning aids. The apprentice can take practice tests, see their results, and practice the concepts they still need to improve. Practice questions come with tutorial help, including videos and step-by-step instruction.

provides IEC apprentices with a customized, online math course

organized into simple, weekly lesson units. This powerful tool has objectives designed to meet the specific needs of students pursuing an IEC apprenticeship. Course content is challenging and fosters critical thinking. The course components - including pre-tests and quizzes, interactive lesson presentations, writing assignments, discussion questions, study aids, primary sources, lesson checklists, audio lectures, and multimedia presentations have been reviewed by National IEC and Chapter Representatives.
