

# BICSI Certification Classes Now Taught In Memphis

That's right...no more additional travel costs to Tampa Florida to get BICSI certified. You and your employees can now receive BICSI certification in your own back yard.

The Mid-South Independent Electrical Contractors Association (IEC) is a trade association for Electrical and Low Voltage contractors. The IEC has a new training facility in Bartlett. The IEC has been approved by BICSI to certify individuals as either a BICSI Installer II Copper (IN225), BICSI Installer Level II Fiber (IN250) and a BICSI certified Technician (TE350).

## *Quality Instruction*

Out of the 200 plus BICSI Certified Trainers worldwide, the Mid-South IEC's BICSI Trainer is only one of two BICSI Trainers that holds the RCDD, NTS and OSP certifications.

## *First class training facility*

The IEC has prided itself on developing a first class training facility where you and your employees will be comfortable while receiving the BICSI certifications.

We have exceeded BICSI's requirement by having twice the amount of racks and panels that the students will be able to use to practice the hands on portion of their training.

## *Save time by attending the BICSI courses at the IEC's Training Facility.....how...read on...*

The difference in the BICSI courses offered here at the IEC as oppose to other BICSI training facilities is that we teach the courses with you in mind. Meaning how we manage the required hours for the BICSI courses is different than other BICSI Training Facilities.

The BICSI Courses are required to be 40 hours in length. Most of the other BICSI training facilities conduct the 40 hours of training over five consecutive days, usually Monday through Friday.

However we have learned that most BICSI students cannot afford to be pulled out of the field for five consecutive days. Therefore we teach the 40 hour courses over two weekends. The first 20 hours are taught on a Friday and Saturday and the next 20 hours are taught the following Friday and Saturday. This way you can receive a BICSI certification and only miss two days of work.

To learn how to register, and for additional information on these BICSI classes, you can contact the IEC office at: (901) 682-3546 or visit our website at [www.midsouthiec.org](http://www.midsouthiec.org)
